

DESIGNER SERIES | CACAO

Countless timbers were reviewed to trial the result of combining chocolate timber laminate with matt black shelving. We hope you agree that the marriage is perfect!

Slightly retro and very sophisticated, we envisage this design teamed with classic Scandinavian style furniture to create a timeless effect. Matching black slats on the bay end panels combine with antique gold 3D lettering on the signs to complete the stylish unit that would work equally as well for a special collection as it would across the entire library.
